KINGVILLE NURSERY, INC.
H. J. ROBERTS
KINGVILLE, MARYLAND.

we present the following additional list of plants which are not at present listed in our catalog.

From time to time, we have ready additional varieties of plants which were not ready for sale at the time our catalog was being printed. We shall at various times make up lists which will offer some very rare plants and also, new varieties that we have not offered before.

May we suggest that when ever you are trying to find a certain plant not generally cataloged, just write us about it and possibly we have the very plant you are looking for.

when Lilacs, Cherries, Grabs, Dogwoods, Cydonias, Azaleas, etc. are in bloom, you would enjoy seeing our many varieties.

Cydonias are known as Flowering Quince, and in the industry of plant growing we know them as "Chaenomeles". To see these in flower is a real treat.

Visit our nurseries in spring to see flowering plants and trees, and fall to see the many berry-bearing plants and trees.

We are growing many plants in standard form, such as Viburnum Carlesii, V. Burkwoodii, Lonicera syringantha, Hybrid Flowering Quinces and others. These are all very interesting and have places in our gardens.

we hope to have our large collection of hollies ready by fall. These are most interesting.

CHAENOMELES-Flowering Quinces
